- Long file names
- Unlimited fields
- Print to picture or to file
- TextArt

Database

- Database editor (DBF and ODBD data source)
- OLE DB and ODBD support
- Key field access to database records
- Table view/print
- DSN file support

Variables

- Flexible date and time stamping
- Variable graphic images
- Shared serial files
- Linked expressions
- Add an offset to date
- Incrementing fields

User Input Fields

- Set input format
- Pick List data entry
- Minimum input length

Tools

- Pocket LABELVIEW support
- Directly modify printer code with Job Modifier utility
- LABELVIEW Symbol TrueType Font (industry specific symbols)

Programmability

- OLE Client (insert WordArt, spreadsheets, etc.)

Label Inventory Control

- Tracks on hand quantity
- Defines re-order points
- Low stock level warning

LabelView™ Gold

The ultimate in label design and integration, CommWatch allows you to link with weigh scales, bar code scanners, shop floor controllers, counters or other devices. Receive, format and use data from this source instantly to put required data into labels without keying. DataWatch lets you monitor a file directory, whenever a database has records added to it, or a new database written to it by another host or application. LabelView™ Gold can be configured to print appropriate labels; automatically and instantly.

Network Versions - Gold
